Contents

PART 1

1 Book reviews
3 Characteristics of alternating temperatures which stimulate loss of dormancy in seeds of *Rumex obtusifolius* L. and *Rumex crispus* L.
Susan Totterdell & E. H. Roberts
13 Responses of apple leaf stomata to environmental factors
B. Warrit, J. J. Landsberg & M. R. Thorpe
23 Responses of apple leaf stomata: a model for single leaves and a whole tree
M. R. Thorpe, B. Warrit & J. J. Landsberg
29 Stomatal response to humidity: implications for transpiration
J. J. Landsberg & D. R. Butler
35 Root nodule anatomy, type of export product and evolutionary origin in some Leguminosae
J. I. Sprent
45 The effect of red light in the high irradiance reaction of phytochrome: evidence for an interaction between *Pfr* and a phytochrome cycling-driven process
C. B. Johnson
53 Technical report: The uptake and release of water vapour by the foam seal of a diffusion porometer as a source of bias
H. R. B. Hack
59 Measurement of hydraulic conductivity of barley roots during inhibition of ion transport by azetidine 2-carboxylic acid
M. G. Pitman

PART 2

63 Book reviews
65 Sources of reductant for nitrate assimilation in non-photosynthetic tissue: a review
R. B. Lee
91 Radioimmunoassay of phytochrome content in green, light-grown oats
Robert E. Hunt & Lee H. Pratt
97 Allocation of carbon to growth, storage and respiration in the vegetative barley plant
J. F. Farrar
107 Paraquat tolerant and susceptible perennial ryegrasses: effects of paraquat treatment on carbon dioxide uptake and ultrastructure of photosynthetic cells
Barbara M. R. Harvey & T. W. Fraser
119 Copper tolerance in the green alga, *Chlorella vulgaris*
Michael Butler, Anthony E. J. Haskew & Marsali M. Young
127 Gravity induces fast electrical field change in soybean hypocotyls
Takuma Tanada & Christian Vinten-Johansen
131 Water relations of drought hardy shrubs: osmotic potential and stomatal reactivity
T. M. Hinckley, F. Duhme, A. R. Hinkley & H. Richter
141 Rapid development of cell suspensions cultures from leaf sections of *Chenopodium rubrum* L.
W. Geile & E. Wagner
149 The effects of O_2 on net photosynthesis at low temperature (5°)
Gabriel Cornic & Geneviève Louason

PART 3

159 Correspondence
163 Effect of water stress on metabolism of abscisic acid in *Populus robusta* × Schnied and *Euphorbia lathyrus* L.
S. Sivakumaran, R. Horgan, J. Heald & M. A. Hall
175 Row structure and foliage geometry as determinants of the interception of light rays in a sorghum row canopy
M. Fuchs & G. Stanhill
183 Modifications of chloroplasts of flax cotyledons treated with monuron: myelinoid figures formed under low light conditions
K. E. Pallett & A. D. Dodge
189 Photoregulation of hypocotyl growth: geotropic evidence for the operation of two photosystems
J. W. Hart & I. R. MacDonald
195 $2H^+ : 1$ malate^{2-} stoichiometry during Crassulacean Acid Metabolism is unaffected by lipophilic cations
U. Lüttge & E. Ball
201 Effects of decreasing source sink ratio in soy beans on photosynthesis, photorespiration, transpiration and yield
M. M. Peet & P. J. Kramer
207 Hysteresis in the response of stomatal conductance in *Pinus sylvestris* L. needles to light: observations and a hypothesis
P. A. P. Ng & P. G. Jarvis
217 Purification and molecular properties of acid phosphatase from sycamore cell walls
M. Crasnier, G. Noat & J. Ricard
225 Ionic control of acid phosphatase activity in plant cell walls
G. Noat, M. Crasnier & J. Ricard

PART 4

231 Book review

233 Research strategy in the plant sciences
J. H. M. Thornley
237 Alfalfa water status and cold hardiness as influences by cold acclimation and water stress
D. G. Stout
243 Germination and seedling growth under anaerobic conditions in *Echinochloa crusgalli* (barnyard grass)
R. A. Kennedy, S. C. H. Barrett, D. Vander Zee & M. E. Rumpho
249 Immunological studies on phosphoenol-pyruvate carboxylase in *Sedum* species with crassulacean acid metabolism or C_3 photosynthesis
D. Müller, M. Kluge, U. Gröschel-Stewart
255 Effects of organic acids on the germination of seeds and growth of seedlings
J. M. Lynch
261 Characterization and comparisons of five N_2-fixing *Azolla-Anabaena* associations, I. Optimization of growth conditions for biomass increase and N content in a controlled environment
G. A. Peters, R. E. Toia, Jr, W. R. Evans, D. K. Crist, B. C. Mayne & R. E. Poole
271 Temperature responses of membrane-associated activities from spring and winter oats
H. Thomas, J. L. Stoddard & J. F. Potter
279 Reduced stomatal responses to light, carbon dioxide and abscisic acid in the presence of sodium ions
R. G. Jarvis & T. A. Mansfield
285 Daylength change and leaf appearance in winter wheat: Short Communication
C. K. Baker, J. N. Gallagher & J. L. Monteith

PART 5

289 Book reviews
291 Correspondence
293 The physiological significance of cyanide-resistant respiration in higher plants
Hans Lambers
303 Absence of nitrate reductase activity in San 9789 bleached leaves of barley seedlings (*Hordeum vulgare* cv. Midas)
C. E. Deane-Drummond & C. B. Johnson
309 Chemical composition of salt-marsh plants Ynys Môn (Anglesey): the concept of physiotypes
J. Gorham, LL. Hughes & R. G. Wyn Jones
319 Disappearance of gas vacuoles in the blue-green alga *Microcystis aeruginosa*
Heiner Lehmann & Christine Wiencke
325 Acid-base regulation during ammonium assimilation in *Hydrodictyon africanum*
J. A. Raven & M. I. De Michelis
339 The effects of triphenyltin chloride on respiration and photosynthesis in the green algae *Enteromorpha intestinalis* and *Ulothrix pseudoflacca*
P. A. Millner & L. V. Evans
349 Biosynthesis of ethylene: the effect of phosphate
E. Chalutz, A. K. Mattoo & Y. Fuchs
357 Fusicoccin effects on maize roots: relationship between malate accumulation and elongation
M. Gabella & P. E. Pilet
363 Photomorphogenesis and phyllotaxis during vegetative growth in *Sinapis alba* and *Xanthium strumarium*
S. Barsch-Gollnau, A. Ritterbusch & H. Mohr
371 Materials and methods for carbon dioxide and water exchange analysis
A. J. Bloom, H. A. Mooney, O. Björkman & J. Berry
377 A re-examination of the induction of phloem transfer cell development in pea leaves (*Pisum sativum*)
Yvonne Henry & Martin W. Steer
381 The sedimentation of amyloplasts in living statocytes of the dandelion flower stalk
Paul E. Clifford & Gregor F. Barclay

PART 6

387 Book reviews
391 Effects of CO_2 concentration and irradiance on the stomatal behaviour of maize, barley and sunflower plants in the field
W. Louwerse
399 The ionic relations of *Porphyra purpurea* (Roth) C. Ag. (Rhodophyta, Bangiales)
R. H. Reed & J. C. Collins
409 Changes in starch and glucose levels in the epidermis of *Commelina communis* in relation to stomatal movements
M. E. Donkin & E. S. Martin
415 The influence of environmental factors on apparent photosynthesis and respiration of the submerged macrophyte *Elodea canadensis*
P. S. Simpson, J. W. Eaton & K. Hardwick
425 A study of the source of virus in the phloem exudate appearing on leaves of *Amsinckia* infected with the beet curly top virus
K. Esau & A. C. Magyarosy
435 Low temperature acclimation of root fatty acid composition, leaf water potential, gas exchange and growth of soybean seedlings
A. H. Markhart III, M. M. Peet, N. Sionit & P. J. Kramer
443 Boundary layer conductance of the leaves of some tropical timber trees
J. Grace, F. E. Fasehun & M. Dixon
451 Accumulation of carbon compounds in the epidermis of five species with either different photosynthetic systems or stomatal structure
N. Thorpe
461 The promotive effect on subsequent germination

of treating imbibed celery seeds with high temperature before or during drying
N. L. Biddington, T. H. Thomas & A. S. Dearman
467 Stomatal response to environment and a possible interrelation between stomatal effects on transpiration and CO_2 assimilation
A. E. Hall & E.-D. Schulze
475 Diurnal progressions in dry weight and short-term plant growth studies: Short communication
R. Hunt
479 Measurements of photosynthesis in the field: utility of the CO_2 depletion technique: Technical report
J. Ehleringer & C. S. Cook
483 Instructions to contributors
